Faculty Development Opportunity

Are you interested in learning how to develop your own Study Abroad Course but:

1. uncertain about how to begin,
2. unfamiliar with figuring out the logistical details about study abroad,
3. don't have the time to develop the lesson plans,
4. want to be a fiscally responsible as possible.

Study abroad can be made safe, easy and affordable. If you would like to learn how to develop your own study abroad course, in any discipline, please join me on one of the trips I am leading to Belize. While I don't claim to be an expert in study abroad, I have been successfully running study abroad trips, to various countries, for over 8 years. If you are interested in learning how to navigate the study abroad logistics I invite you to come along on my next trip.

Please visit http://www.llcc.edu/Default.aspx?alias=www.llcc.edu/belize for more details about the various resources and trips available to educators, students and community members. Trip cost will vary depending on which trip you attend as well as if you purchase your own airfare or travel with the group. Please contact me for more details about the prices.

In an attempt to help offset some of the trip expenses I have several stipends ($500.00) available for faculty willing to develop curriculum modules that can be used in conjunction with the Belize Adventures program in Belize. Please see the website for more details about the types of curriculum that have been developed as well as the curriculum development forms. I welcome instructors from all varieties of disciplines on these trips. Study abroad is something that can and should be done is as wide of variety of disciplines as possible. The goal is, by the end of the trip you have all of the information necessary to start putting together your own study abroad course to Belize. I am more than happy to assist in any way possible.

Please let me know if you have any questions or are interested in joining the next adventure.
