How to figure out how much students should borrow if they only want to borrow enough to pay for their LLCC bill.

ARAI: Amount owed for tuition before the loan was applied \$ _____

Multiply this amount by 1.0106. ROUND DOWN to whole dollar. \$ _____

This should be approximately the amount the student should borrow if they don't want a refund.

Change the TERM loan amount to this amount, and run FATR (IN NON-UPDATE MODE). Reduce the amount borrowed down if necessary to make sure the student is not going to get a small refund. When the FATR pre-transmittal is correct, run FATP to un-transmit the loan. This should be the amount of the returned refund check from the student. Take the ENDORSED check to LLCC Admission/Records/Registration, and apply it to the balance owed.
