Introduction

As part of an ongoing accountability and program improvement initiative, Lincoln Land Community College annually conducts a survey of occupational program graduates. This report provides information on graduates of occupational programs regarding the effectiveness of their community college experiences. Graduates are asked to complete a standardized survey instrument that addresses attendance objective, education status, employment status, salary, employment start-up, geographic location of employment, and satisfaction with employment and components of the educational program completed. Data gathered from these surveys provide valuable information for the College's program review process and assists the College in providing satisfactory employment and compensation for their graduates.

The Illinois Community College Board identifies the programs that must be included at each local campus. Lincoln Land Community College elects to include all occupational programs in the follow-up survey. Former students who completed occupational programs during fiscal year 2011 (summer term 2010, fall term 2010, or spring term 2011) were mailed and emailed surveys. If a graduate did not respond to the initial questionnaire, a second survey was forwarded. If the second contact with these students did not elicit a response, LLCC staff attempted to contact the graduate by phone.

A total of 1,147 LLCC former students were surveyed in March 2012. Three hundred eighty-eight persons responded, yielding a response rate of 33.8 percent. Graduates from the programs that ICCB identified as required for fiscal year 2011 accounted for 95 of the surveyed graduates and 54 of the responses, yielding a response rate of fifty-seven percent. The great response rate this year can largely be contributed to the assistance of the Health Professions program staff in soliciting responses from their graduates. Because overall results are influenced by program size, the data reported in Tables 1 - 13 are provided by program category. Table totals will vary due to some respondents failing to answer all survey questions.
